

RHYNO Windshield Cutter

The RHYNO Windshield Cutter is a unique extrication tool used to rapidly remove vehicle glass to gain access to injured occupants.

Windscreen, passenger and rear windows can be removed in under 30 seconds for quick access to patients or for further rescue operations.

When cutting a vehicle windscreen, glass debris is concentrated on the outside of the vehicle and falls down. Airborne dust is minimised and any vehicle occupant is protected.

Features

- The new RHYNO2 is up to 30% faster than the original RHYNO tool.
- Minimizes patient access time
- Minimal protrusion inside, less than 25mm
- Can be used against patient skin/clothing
- Minimizes risk of injury from flying glass debris
- Channels glass debris outside of vehicle
- Clean cut results in smoother and safer portal edges
- Single hand use - right or left - Low Vibration
- Easy to control - precision cuts, Cuts tight corners
- Can be used by any 1st Responder
